

Jarno Vuorinen

Professional Photographer in northern Finland

About me

Since 2017, I have been capturing the essence of moments through my lens, bringing a blend of experience and technical skill to each event. My journey in photography began with earning a Further Vocational Qualification in Photography, followed by the Specialist Vocational Qualification in Photography. This formal education has equipped me with a deep understanding of the art and science of photography.

Further cementing my expertise in the field, I have been honored with the European Photographer qualification by the Federation of European Photographers (FEP), a testament to my commitment to quality and excellence in professional photography.

With a focus on high-quality, atmospheric images that showcase my unique style and attention to detail, I strive to capture the moment for each event.
